SUMMARY

Software Engineering student skilled in Python, SQL, OOP, and database management, with hands-on experience building academic and personal database-driven applications. Driven by a passion for problem-solving and continuous learning, currently expanding into Artificial Intelligence (AI) and Machine Learning (ML).

EDUCATION

Bachelor of Software Engineering **2025 - 2029**

The Islamia University of Bahawalpur (IUB), Pakistan

GPA: 3.69 / 4.00

Relevant Coursework

Obect Oriented Programming and Algorithms, Digital Logic Designs, Python fundamentals, Data Structure and Database Systems

SKILLS

Programming Languages:	Python, C++, SQL
Framework and Technologies:	Machine Learning, Numpy, Streamlit
Data Analysis:	SQL(querying, joins) , Pandas (data cleaning, analysis)
Tools & Plateforms:	Git, VS Code, MySQL

WORK EXPERIENCE

Software Development Intern **May 2026 - Present**

(DeveloperHub Corporation)

- Built web based applications and software projects using Python and web technologies.
- Applied programming and problem-solving skills in university projects.

Twitter Outreach **March 2026 - April 2026**

- Managed and grew the company's presence on Twitter by engaging with targeted audiences.
- Created and posted engaging content, including tweets, threads, and replies, to increase visibility and interaction.

PROJECTS

Library Management System | Python, Streamlit, MySQL, Aiven Cloud

[live demo **] [** source code **]**

- Built and deployed a full-stack Library Management System using Python, Streamlit, and MySQL, supporting member registration, book issuing/returns, and record tracking
- Integrated a cloud-hosted MySQL database (Aiven) with SSL-secured connections and implemented access-controlled authentication for secure deployment
- Deployed live on Streamlit Community Cloud, managing environment configuration, dependencies, and database connectivity end-to-end
